Anvisningar för tjänsteresa utom Norden enligt delegationsordningen p 2.4

Ansökan

Direktören beslutar om tjänsteresa utom Norden. Avdelningschef/verksamhetschef ska tillstyrka ansökan. Biljetter m.m. ska inte beställas innan ansökan är beviljad.

Rutin

Använd blankett ”Utrikes tjänsteresa” som bifogas nedan. Blanketten finns i verksamhetshandboken under avsnitt 1.6, *Övergripande rutiner/riktlinjer*.

När avdelningschef /verksamhetschef har tillstyrkt ansökan, lämnas den till direktören för godkännande och beslut.

Om en avdelningschef/verksamhetschef ska delta på tjänsteresan, skickas ansökan direkt till direktören för beslut utan tillstyrkande.

Direktörens tjänsteresa utanför Norden beslutas av nämndens ordförande.

Göteborgs Stad

Park och natur

Delegationsbeslut

Enligt delegation nr 2.4:
Besluta om tjänsteresa
utanför Norden

Beslut om tjänsteresa till Eurocities Environment Forum

Resmål: Porto, Portugal

Datum: 18-20 mars 2020

Resande: Camilla Finsberg

Färdstätt: Flyg

Syfte och förväntad positiv effekt för enhetens verksamhet av resan:

Staden ingår i nätverket Eurocities och Camilla är stadens representant i arbetsgruppen Green Areas and Biodiversity (GAB).

Delta i arbetsgruppens möte som bland annat kommer handla om gröna dagvattenlösningar. Mötet behandlar även EU:s European Green Deal samt EU Biodiversity Strategy 2030.

Dessutom medverka på miljöforumet vars tema är ”Cities inspired by nature”. Nätverka, utbyta erfarenheter, berätta om Göteborgs arbete med frågorna och få inspiration av hur andra städer i Europa arbetar.

Efter hemkomst presentera relevant information för kollegor på enheten/avdelningen samt andra berörda förvaltningar och samarbetsgrupper i staden.

Innehåll

Program för konferensen samt dagordning för arbetsgruppen Green Areas and Biodiversity bifogas.

Arrangör: Eurocities

Kostnad: Uppskattade prisuppgifter: 3 hotellnätter à 1000-1500 kr samt flygresor mellan 4000-5000 kr, totalt mellan 7000 och 9500 kr. Själva konferensen kostar inget.

Tillstyrks

Godkänns

Tid:

Vad avsåg resan:

Blev resans syfte och mål så som planeringen var vid ansökningstillfället?

Kort beskrivning av genomförandet och de positiva/negativa erfarenheter som upplevdes på resan:

Denna resa kan även rekommenderas till andra enheter eftersom:

Datum:

Namn:

Reserapporten ska skickas till berörd chef senast en månad efter genomförd resa.

Draft agenda

EUROCITIES WG green areas and biodiversity

18 March 2020

Porto, Portugal

Registrations: <https://eef-2020-porto-guimaraes.eventbrite.com>

WORKING DOCUMENTS

The documents will be uploaded under the “EUROCITIES Members Area” in the section corresponding to the Working Group Waste. Please go to the EURO CITIES website (www.eurocities.eu), log in and under “my events”, look for this meeting. If you have problems accessing the documents, please contact the EURO CITIES secretariat before the meeting.

CONTACTS:

Chair:	Gitty Korsuize	g.korsuize@utrecht.nl
	Carolina Rodrigues	carolina.rodrigues@labpaisagem.pt
EUROCITIES:	Heather Brooks	heather.brooks@eurocities.eu

Venue:

Wednesday 18 March 2020

Venue:

09:00-09:15 Welcome and introductions

09:15-10:00 European Green Deal + EU Biodiversity Strategy 2030
(Heather Brooks, EUROCITIES)

- Actions
- Presentation: 15 minutes + 5 mins Q&A
 - Initial reactions to the proposal; what could be improved?

10:00-10:30 Lobby strategy for the next year

- Actions
- What can we do to promote biodiversity on an EU level and within our cities?
 - How can highlight the importance of access to (biodiverse) green space?

10:30-11:00 COFFEE BREAK

11:00-12.30 Green City Accord and thematic session

- Actions
- Presentation on Green City Accord
 - Input from cities:
 - o What are the key challenges to increasing biodiversity and restoring degraded ecosystems in cities?
 - o Are there any barriers to improving access to green and blue space?
 - o How can we ensure that green and blue spaces within our cities are biodiverse?

We will explore which are the most common challenges identified, and these will be taken forward to our autumn meeting where we will work together to find possible 'solutions' to these problems.

12:30-13:30 LUNCH BREAK

13:30-15:00 Joint meeting with WG water on stormwater retention

- Introduction of WG GAB and WG Water
- Meeting to focus on joint effort for green areas and water to tackle climate change
- Each city presents projects concerning stormwater retention and management followed by discussion
- Future collaboration (discussion)

- 15:00-15:30 Close of WG GAB meeting**
- Quick update on future of EUROCITIES
 - Next meeting - meeting plan for 2020
 - Conclusions
 - Any other business
 - Short evaluation of the meeting

15:30-15:40 COFFEE BREAK

15:40-17:30 Study visit in Porto

18.00-19.00 **Steering committee meeting (WG chairs only)**

Porto and Guimaraes

18-20 March

EUROCITIES Environment Forum meeting 'Cities inspired by nature'

Registrations available at: <https://eef-2020-porto-guimaraes.eventbrite.com>

		WG Water	WG GAB (green areas and biodiversity)	WG AQCCCE (air quality, climate change, energy efficiency)	WG Waste	WG Noise (Tuesday 17 th March 13.30-17.30)
Porto Wednesday 18 th	All day					
	19:15	Cocktail Reception				
	20.30	<i>Informal dinner (optional)</i>				
Guimaraes Thursday 19 th	morning	Session 1 - Nature as inspiration for cities, nations and Europe Session 2 - How can our working groups harness nature?				
	afternoon	Session 3 - Site visits				
	evening	<i>Official dinner</i>				
Porto Friday 20 th	morning	Session 4 - Deep-dive sessions on the city in nature Session 5 - City networking session Session 6 - European Green Deal - what does it mean for cities?

carlos.ribeiro@labpaisagem.pt

MUNICÍPIO DE
GUIMARÃES

Nature is declining at unprecedented rates with over one million species at risk of extinction. This is eroding the very foundations of our economies, livelihoods, food security, health and quality of life. Simultaneously, cities face multiple and converging challenges. The climate is changing bringing unpredictable weather patterns leading to more frequent floods and droughts, causing oceans to acidify and forests to burn. At the European level, the new European Commission has announced an ambitious European Green Deal which aims to transform the EU into a fair and prosperous society with a resource-efficient and competitive economy. But we need action fast. Cities are taking that action.

At this year's Environment Forum - jointly hosted by Porto and Guimaraes - explore how cities are harnessing the power of nature to address these environmental challenges. How can nature inspire urban design and management processes in order to create resilient and prosperous environments? How can we build cities that not only use the resources available, but provide for a thriving future? We will explore how nature-based solutions can boost climate change adaptation, transform our food systems, enhance green infrastructure and encourage new governance strategies that can transform the way we think about 'green' policy planning.

Leonardo da Vinci once commented that *"those who are inspired by a model other than nature are labouring in vain"*. Join us as we explore how to harness nature's power to tackle the defining problems of the twenty-first century.

DAY 1: Wednesday 18 March

Clube Fenianos Portuenses (Rua Clube dos Fenianos, 29)

Wifi:

	(air quality, climate change and energy efficiency)		(green areas and biodiversity)		

15.30 - 15.40 *Coffee break*

15.40 - 17.30	Study visit	Study visit	Study visit	Study visit	Study visit
----------------------	--------------------	--------------------	--------------------	--------------------	--------------------

18.00 - 19.00 **Steering committee (WG chairs only)**

Clube Fenianos Portuenses, Rua Clube dos Fenianos, 29 [Library Room]

19.15 - 20.15

Cocktail Reception

Câmara Municipal do Porto (Town Hall, Câmara Municipal do Porto, Praça General Humberto Delgado)

20.30-22.00

Informal dinner (approximately 20€)
Venue:

DAY 2: Thursday 19 March

Parque da Penha, EM579 2 658, Guimaraes

Wifi:
Password:

08.00 - 09.00 *Travel from Porto to Guimaraes (buses provided by Porto; Meeting point at 07:45 at Porto Town Hall, Praça General Humberto Delgado). Buses will leave at 8:00 sharp.*

09.00 - 09.30 *Welcome breakfast and registration*

9.30 - 10.00 *Moderator:*

Welcome address

- **Domingos Bragança**, Mayor, city of Guimaraes
- **Filipe Araujo**, Deputy Mayor, city of Porto

10.00 - 11.15 **Session 1: Nature as inspiration for cities, nations and Europe**

10.00 - 10.20 **Keynote speech by Arndt Pechstein (Biomimicry Academy) (tbc)**

10.20 - 11.30 **Nature as the solution to urban challenges**
How can cities re-nature their urban planning to adapt to-and mitigate environmental challenges? How have cities adapted their governance strategies to achieve this? What role do the European institutions play in ensuring cities are better equipped to respond to current and future challenges? How can cities inform European policies to ensure that nature (as a tool and in its protection) forms the basis of policy development, and not a subsection?

- **Anna Richardson**, Councillor, City of Glasgow (tbc)
- **Janet Sanz**, Deputy Mayor of Barcelona (tbc)
- **Adam Zawada**, Deputy Mayor of Wrocław (tbc)
- **Stefan Leiner**, Head of Unit Biodiversity, DG ENVI, European Commission (tbc)
- **Nicolae Stefanuta**, RenewEurope, Member of European Parliament (tbc)

11.30 - 12.00 *Family picture and coffee break*

12.00 - 13.15 **Session 2: How can our working groups harness nature to address the big challenges?**

12.00 - 12.50 **Working group co-chair presentations**
How can nature help us tackle challenges such as climate change, air pollution water scarcity, noise pollution, and waste?

Each WG co-chair will present how nature can be employed to help mitigate and/or adapt to relevant environmental challenges (8 minutes presentation followed by 2 minutes Q&As).

- WG AQCCEE
- WG Green Areas and Biodiversity
- WG Noise
- WG Waste
- WG Water

12.50 - 13.15

Panel and participant discussion around the potential of nature as a basis for tackling environmental challenges, and the synergies between environmental challenges, different policy areas and potential solutions.

13.15 - 14.30

Lunch break

14.30 - 17.00

Site-visits in Guimaraes

- **Group 1: Sustainable Use of Land**
Brief presentation on how Guimaraes is facing Climate changes challenges in terms of Mitigation (Carbon near zero building) and Adaptation (Retain basins)- Walking tour through Urban Green area
- **Group 2: Community gardens and Landscape laboratory**
Walking tour to Urban Community gardens (500 plots for community use) and visit to Landscape Laboratory; a RD centre on Sustainable development
- **Group 3: University Campus**
Visit to Waste Valorization centre CVR, PIEP - Polymeric Valorization Institute, Bio sustainability Institute
- **Group 4: Promoting Biodiversity at UNESCO World Heritage**
Brief presentation on How Guimaraes is protecting and promoting Biodiversity in world heritage (Urbact P2GREeN project)
- **Group 5: Nature routes at Penha Mountain**
Walking tour to showcase how Guimaraes is promoting the connection between the Urban centre and mountain

17.00 - 18.00

Travel from Guimaraes to Porto (buses provided by Porto; pick-up at Multiusos, Alameda Cidade de Lisboa 481, Guimaraes)

20.00 - 22.00

*Formal Dinner
Venue:*

DAY 3: Friday 20 March

Clube Fenianos Portuenses (Rua Clube dos Fenianos, 29)

Wifi:

Password:

08.30 - 09.00

Welcome coffee and registrations

09.00 - 10.30

Session 4: Deep-dive sessions on the city in nature

Session 4.1: Understanding your city's natural resource capacity, and how to maximise it [[Theatre room](#)]

Every year we demand more from nature than it can replace. This battle for sustainability will be won or lost in cities. What if we could measure and limit our cities' demand on natural resources? Imagine if a city's funding from the national government were calculated based on its Ecological Footprint and available resources. In a three-step project, six cities in Portugal - including Guimaraes - are experimenting with this innovative concept. From understanding what natural resources are available to a city, to how citizens can measure and reduce their consumption, the cities will work towards an alternative approach for national budget allocation, based on the size of their Ecological Footprints and biocapacities relative to those of Portugal.

Join us in this deep-dive session as we explore preliminary results from this ongoing project, how it's affecting sustainable urban policy and changing local consumption patterns. Together we'll analyse the ecological footprint tool and consider its strengths and weakness, and how it could be applied elsewhere.

- [Alessandro Galli](#), *Director Mediterranean programme, Global Network Footprint*
- [Isabel Loureiro](#), *Mission Struture Guimaraes 2030, city of Guimaraes*
- [Sara Moreno Pires](#), *professor at the University of Aveiro*

Session 4.2: The Common Home of Humanity: using economy to protect nature [[Library room](#)]

The ability of humans - and all animal and plant species - to survive and thrive on Earth has been made possible by a unique period in the history of the Earth System, which has thus far provided favourable conditions - this is known as the Safe Operating Space for humanity. This favorable state of the Earth System is humanity's ultimate global common - intangible and legally indivisible - and should be formally recognised as a new object of law. The Common Home of Humanity is a UN-supported initiative with aims to secure the legal recognition of our Safe Operating Space as a Natural Intangible Common Heritage and to develop an environmental-economic accounting system for the monitoring and protection of this Safe Operating Space

- [Marta Pinto](#), *Head of the Environmental Management Office, city of Porto*
- [Paulo Magalhães](#), *General Director, Common Home of Humanity*
- [Ana Barreira](#), *Director, Common Home of Humanity*

Session 4.3: Nature for food, food for nature: greening systems for urban food supply and distribution [[Flamingo room](#)]

Our food systems, nutrition and health depend on biodiversity and healthy ecosystems. And yet they are the biggest driver of biodiversity loss. The world

depends on just 9 plant species for 66% of its crops having lost more than 90% of crop variety in the last 100 years. At the same time, farmers are contending with multiple challenges including unpredictable weather patterns, increased demand, water scarcity and soil degradation. We must rapidly and radically transform our food systems if we are to limit emissions in line with the Paris Agreement and reverse the rapid decline in biodiversity.

- [Andrea Magarini](#), chair of WG Food, city of Milan (tbc)
- [City of Ljubljana](#) (speaker tbc)
- [Jeroen Mercy](#), Environment and Climate Service, city of Ghent

10.30 - 11.00

Coffee Break

11.00 - 12.00

Session 5: Speed city networking session

Roundtable speed networking sessions moderated by cities for cities; delivering a wide range of presentations focused on nature. Each roundtable will last 30 minutes (15 minutes presentation followed by 15 minutes discussion) [open call for topics]

Table 1: Flying Squirrel LIFE project: nature directive species protection in urban nature (Laura Lundgren, Sustainable development coordinator, city of Espoo)

- Espoo is participating in a LIFE project (2018-2025), with partners from Finland and Estonia, to improve the protection of the flying squirrel in increasing urban environments as well as forestry areas. Protecting the flying squirrel brings many benefits to urban green areas and services for the urban inhabitants. The project includes radio-telemetry monitoring of individual squirrels (10 individuals) to track their habitat usage in urban environment and the use of trained survey dogs exploring their ability to trace squirrel habitats. A toolkit will be developed outlining good practices including which kind of land use planning practices have resulted in good and sustainable protection status for flying squirrel.

Table 2: Ecosystem Services and Carbon Sinks in Strategic Master Planning Process (Eira Rosberg, Environmental specialist, city of Lahti)

- Lahti are mapping ecosystem services and carbon sinks across the city. Putting this information into a common GSI system as that for land-use and environmental data, this information is being used in urban planning and will guide the next city master plan. Join this table to find out more!

12.00 - 13.15

Session 6: The European Green Deal - what does it mean for cities?

12.00 - 12.15

Latest network developments from EUROCIITIES

- Update on future of EUROCIITIES
- 100 climate neutral and smart cities

12.15 - 13.15

The European Green Deal - what is it and what does it mean for cities?

Following an overview of the European Green Deal, participants will break down into small roundtables based on the below policy streams. What do you consider to be the most pressing issues coming forward from the European Green Deal? Are there any key challenges you already identify in the communications of the proposals? Let's brainstorm some early ideas for lobby actions: what, where, when!

- [TABLE 1](#)
- Circular Economy Action Plan
- EU Industrial Strategy

- [TABLE 2](#)
- EU Biodiversity Strategy 2030
- EU Farm to Fork Strategy

- [TABLE 3](#)
- Zero Pollution Strategy

- [TABLE 4](#)
- European Climate Law
- EU 2030 Climate Targets
- Climate Pact

- [TABLE 5](#)
- Just Transition Fund

- [TABLE 6](#)
- Renovation Wave

13.15 - 13.30

Closing of forum

13.30 - 14.00

Light lunch
